

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

Claims 1-23. (canceled)

Claim 24. (previously presented) A server apparatus connected with a transmitting facsimile and a receiving facsimile via the Internet, the server apparatus comprising;

a memory configured to store capabilities regarding facsimile data that the receiving facsimile can receive; and

a controller configured to receive facsimile data from the transmitting facsimile, to transform the received facsimile data into a type of facsimile data that the receiving facsimile can receive, based on the capabilities stored in the memory, and to transmit the transformed facsimile data to the receiving facsimile.

Claim 25. (previously presented) The server apparatus according to claim 24, wherein a capability regarding a facsimile data is a type of file data that the receiving facsimile can receive.

Claim 26. (previously presented) The server apparatus according to claim 25, wherein a type of file data is at least one of MH, MR, MMR and JPEG.

Claim 27. (previously presented) A server apparatus connected with a facsimile via the Internet, the server apparatus comprising;

a memory configured to store capabilities regarding facsimile data that the facsimile can receive;

a controller configured to receive, from the facsimile, an e-mail with a predetermined address, the e-mail indicating the capabilities of the facsimile to be stored in the memory, and to store the capabilities of the facsimile in the memory.

Claim 28. (currently amended) The Internet facsimile apparatus according to claim 27, wherein the controller determines whether or not the e-mail address is the predetermined address, and in response to a determination that the e-mail address is the predetermined address, stores the ~~stores the~~ capabilities of the facsimile in the memory.

Claim 29. (previously presented) An Internet facsimile apparatus connected with a server apparatus via the Internet, the Internet facsimile apparatus comprising;

a communicator configured to communicate with a server apparatus via the Internet;

a controller configured to transmit to the server by e-mail, capabilities regarding facsimile data that the Internet facsimile apparatus can receive, the transmitted e-mail having a predetermined address, the e-mail indicating the capabilities of the Internet facsimile apparatus to be stored in the server apparatus.

Claim 30. (previously presented) A communication terminal capability exchanging method comprising;

storing capabilities regarding a facsimile data that a receiving facsimile apparatus can receive;

receiving facsimile data from a transmitting facsimile;

P18051.A09

transforming the received facsimile data into a type of facsimile data that a receiving facsimile can receive, based in the stored capabilities;

transmitting the transformed facsimile data to the receiving facsimile.
